

Team “The Next Visualization” Charter

Will Christiansen, Ben Creighton, Kyle Michel

Mission

To create a concise, intuitive representation of real-world data.

Values

We value clean, concise, properly commented code and well labeled git commits. Also clear and truthful data representation.

Operating Strategies

- *On e-mail and texts.* Team members should reply within 24 hours of receiving email's being sent.
- *On meetings and progress.* The team plans on meeting for 4 hours every Saturday afternoon where work will be done and the next week's work will be planned. Additional meetings will be planned as needed.
- *On grades.* The team shall aim for an A grade on every deliverable.
- *On the master branch:* Team shall only push working code to the master branch.
- *On deadlines:* For all testing session deadlines we will meet for additional time as needed Saturday as needed.

Roles and Responsibilities*

Data Master: Kyle

- In charge of pulling data from the web and preprocessing for visualization.
- In charge of storage and retrieval of said data

Git Lord: Will

- Oversees all version control, serves as resident expert on Git.
- In charge of managing merge conflicts into the master branch.

HTML King: Ben

-In charge of the graphical organization and the presentation of the data.

*Note: All members will participate in development in all of these categories.

The person named for each is merely the party in charge of overseeing that aspect of the project.

Protocols

The Intervention Protocol

If there are issues with any aspect of the team dynamic, the team will discuss those issues at the next team meeting. If issues persist, they will be brought to Dr. Crenshaw the team will meet with her to work things out.
